

DENINSON DAVID JEYAKUMAR

Apartment 1, Corner House, Corke Abbey Avenue, Bray, A98 DT89 | deninsonjeyakumar@gmail.com | +353 89 213 0980

CAREER SUMMARY

Completed M.Sc. in Artificial Intelligence at Dublin Business School, with a strong foundation in computer science, software development, and applied machine learning. Hands-on experience building deep learning and computer vision systems, Linux/networking infrastructure support, and Java/Python/MySQL software development. Eager to apply technical knowledge and problem-solving skills in a Software Engineering or AI/ML-focused role.

EDUCATION

M.Sc. – Artificial Intelligence <i>Dublin Business School, Dublin, Ireland</i>	2025 – 2026
B.E. – Computer Science and Engineering <i>Mar Ephraem College of Engineering and Technology, Tamil Nadu, India</i>	2021 – 2025
Higher Secondary <i>Bethlahem Matric & Higher Secondary School, Tamil Nadu, India</i>	2020 – 2021

TECHNICAL SKILLS

Programming Languages: Java, Python
Machine Learning & AI: Deep Learning, Convolutional Neural Networks (CNN), Computer Vision, Density Estimation, PyTorch, Reinforcement Learning Algorithms
Web Development: Web Development Fundamentals
Database Management: MySQL
Systems & Networking: Linux System Administration, Networking Fundamentals, Infrastructure Support
Tools & Platforms: Eclipse, VS Code, MySQL Workbench, Google Colab, Jupyter Notebook, Git

PROJECTS

AI-Based Crowd Monitoring and Alert System — M.Sc. Applied Research Project (Github Link)	2025 – 2026
- Developed a deep learning-based crowd density estimation and monitoring system using CSRNet, a dilated-convolution CNN architecture, trained on the JHU-CROWD++ dataset. - Built an interactive Python dashboard (ipywidgets) that converts model output into real-time capacity utilisation and a three-tier safety status for non-technical operators. - Implemented the full pipeline end-to-end, including data loading, annotation parsing, density-map generation, model training and checkpointing, and inference, in a Google Colab/Jupyter environment.	
Implementing Blockchain Technology for Voting Systems with Biometric Authentication (Github Link)	2024
- Designed and developed a secure voting system integrating blockchain and biometric authentication. - Ensured transparency, tamper-proof records, and voter data integrity using distributed ledger technology.	

EXPERIENCE

Infrastructure Services Intern — Fortray	Feb 2026 – Aug 2026
- Gained hands-on experience in Linux system administration and enterprise networking fundamentals. - Supported infrastructure operations, including server and network configuration, monitoring, and troubleshooting tasks.	
Java Programming Intern — Matt Engineering Solutions, Nagercoil, Tamil Nadu, India	Jul 2024 – Aug 2024
- Worked on software development projects using Java. - Contributed to designing and implementing innovative solutions in Java-based applications.	
MySQL Essentials Intern — Gelbero IT Solutions Pvt Ltd, Karungal, Tamil Nadu, India	Feb 2023
- Completed a 7-day internship program focusing on MySQL database management. - Gained hands-on experience in managing, querying, and optimizing MySQL databases.	

SOFT SKILLS

Problem Solving & Analytical Thinking, Team Collaboration, Adaptability & Continuous Learning, Strong Communication

DECLARATION

I do hereby declare that the information furnished above is true to the best of my knowledge.
